### **EXAMINETICS ADDS TO OCCUPATIONAL HEALTH OFFERINGS WITH ACQUISITION OF 1 SOURCE**

*Leading onsite mobile occupational health testing company will now offer injury management, pre-employment services, and drug & alcohol testing through a large network of clinics*

OVERLAND PARK, KS, December 2, 2024 - Examinetics, the nation's leading provider of onsite occupational health solutions for medical screening and surveillance, today announced its acquisition of 1 Source, a company who offers a broad health and compliance portfolio that includes occupational clinic administration, pre-employment/post-offer screening, work-related injury management programs, drug & alcohol testing, ergonomics, and regulatory compliance services.

The addition of these new services allows Examinetics to better serve the multifaceted requirements of safety and HR professionals and creates one of the most extensive safety and compliance portfolios in the industry. The two businesses combine to create the only company that addresses the full employee health lifecycle, delivered on a national scale and across three delivery methods – onsite, near site, and on-demand.

"This strategic acquisition is a major milestone for our company as we continue to expand our portfolio and strengthen our position in the market," said Gary Gluzberg, CEO, Examinetics. "Adding pre-employment services and injury management to our existing occupational health testing portfolio allows us to meet more of the needs faced by safety managers, human resource administrators, and risk management teams. I am very excited to have the 1 Source team join Examinetics."

1 Source President and Owner, Dr. Frank Messana, added "Our team and I are very excited to be joining Examinetics. Our collective technology platforms, deep expertise, and compliance portfolio across multiple delivery methods will help us make a real impact in the safety and health industry. This unique combination creates an organization even better able to serve all the needs in the safety and compliance marketplace."

This acquisition follows Examinetics' recent launch of Salux™, a tablet-based audiometer that enables on-demand hearing testing and training. The company will continue to pursue further investments that position the company as the best choice in the safety industry for innovation, reliability, and convenience.

#### **About Examinetics**

Examinetics is the nation's leading provider of occupational health solutions through onsite, near site, and technology platforms. Our comprehensive suite of occupational health services across the employee health lifecycle delivers strategic value to more than 3,500 clients in over 20,000 locations annually. Leading companies partner with Examinetics to achieve regulatory compliance, minimize productivity loss, and acquire vital data required for optimal health outcomes.
